mustafa.mclinn@outlook.com

Oakland/San Francisco, CA

-Core Competencies

+System Administration & Desktop Support	+Scripting & Automation (Bash, PowerShell, Python)
+Cloud/Hybrid Computing (AWS, GCP, Azure)	+Troubleshooting & Technical Support
+Infrastructure Automation (Ansible, Chef, Jenkins)	+Virtualization & Containerization (Docker, Kubernetes)
+CI/CD Pipelines & Deployment Strategies	+IT Consulting & Solution Architecture
+Network Administration & Security	+Endpoint Management & Software Deployment

-Technical Skills

+OS: Windows, Linux (CentOS, Ubuntu, CoreOS), macOS	+Networking: LAN/WAN, VPN, Firewalls, VLANs, Cisco, HP
+Scripting & Programming: Bash, PowerShell, Python, Ruby, Node.js	+Security & Compliance: IAM, 2FA, Network Security Protocols
+Cloud Technologies: AWS (EC2, S3, IAM), GCP, Azure	+Database Management: MySQL, PostgreSQL, MSSQL, NoSQL
+DevOps & Automation: Ansible, Jenkins, Terraform, Chef, GitLab CI	+Software & Tools: Jira, GitHub, Artifactory, Splunk, SCCM, XenApp

Professional Experience

System Administration & IT Support (1995 - Present)

Teckguy, Independent Consultant, California

Provided IT consulting and technical support across various industries, including healthcare, insurance, legal, arts, and MSPs. Configured and managed Halopsa/Remote Management software for small MSPs. Developed, deployed, and managed streaming services, NAS, and web solutions for non-profits. Managed IT infrastructure for dental offices, ensuring smooth operation of X-ray/Dentrix systems and backups. Supported various small businesses in endpoint management, automation, and troubleshooting complex IT issues.

Systems Administrator / Tier I-II Support (2004 - 2024)

RevisionFX, California

Provided 24/7 tech support for global clients (Japan, Russia, India, etc.). Maintained cloud infrastructure and rolled out updates to AWS production environments. Developed AI/chat support automation to streamline Tier I support. Scripting and automation using PowerShell, Bash, and Zsh for technical fixes and enhancements.

DevOps / Knowledge Engineer (2019)

Insight Engines, San Francisco, CA

Rebuilt CoreOS-driven Docker containers using Ansible on GCP. Used GitLab CI/CD tools and Jira to manage workflows. Audited GCP infrastructure and optimized cloud resource management.

Systems Engineer (2018)

Splunk, San Francisco, CA

Worked in a high-intensity environment maintaining Splunk Cloud services. Resolved complex Splunk issues, performed instance rebuilds, and optimized AWS EC2 stacks. Developed and edited automation scripts in Bash, Ruby, and Node.js.

Systems Engineer (2016 - 2017)

Workday, Dublin, CA

Managed Chef server nodes for CentOS upgrades and documented best practices. Facilitated 4,500+ CentOS live upgrades across global production environments. Developed and edited Bash, Ruby, and Python scripts to optimize workflows. Created an instructional video to guide stakeholders on DIY server upgrades.

LAN Engineer (2015 - 2016)

John Muir Health, Walnut Creek, CA

Provided IT solutions to enhance patient care and safety.

Maintained LAN/NOC operational efficiency, performance tuning, and security safeguards.

Automated onboarding and provisioning processes using PowerShell.

Desktop Engineering / Tier III Support (2011)

First Republic Bank, San Francisco, CA

Provided Tier III troubleshooting and systems upgrades.

Configured SCCM and Active Directory for streamlined deployment processes.

Developed batch scripts to automate troubleshooting scenarios.

MIS & Systems Administration (2007 - 2011)

Concord Feed & Fuel, Pleasant Hill, CA

Sole IT staff managing a multi-location retail and admin IT infrastructure.

Deployed and maintained Citrix XenApp, VPN, and RedHat-based POS systems.

Developed automation scripts in Bash, PowerShell, and batch scripting.

Additional IT Roles (2000 - 2006)

UCSF California Poison Control: Maintained WAN/LAN and implemented security enhancements digital phone systems.

SnoCap DRM: Supported IT infrastructure, Cisco Systems, and SIP configurations for the company formally known as Napster.

Ticket Planet: Managed Windows 2000 Server, Exchange, and Cisco networks for the fourth largest online travel agency in the US.

Dimension 7: Developed, built, and maintained render farms and networked CG workstations for a movie production.

-Consultant Client List

+[RevisionFX](#) 2004-2024 Desktop/Hardware support, and prod development environments and related issues.

+[Poor Magazine](#) 2019-2020 Created radio station, remote studio including /NAS/Web/ and streaming services.

+[Dr. Rathod Dental Office](#) 2019-2025 Consulting for various technical needs x-ray/Dentrix/Backup

+[Flo.Solutions](#) 2024 Configuring connecting Halopsa/Remote Management software and automation for small MSP

+[Eastside Arts Alliance](#) Mostly Endpoint IT duties, helping them overcome various complex issues.

+[LANgineers](#) 2014 Config/run/install Arc SoftSwitch Sip phones for approx. 40+ clients supporting 400+ clients

+[Dr. Cox Dental Office](#) 1997-2019 Supported Dentrix management DB software, and digital X-ray tech.

+[David Quan Insurance](#) 2012-2014 Configured maintained and installed Insurance related products.

+[LMI](#) 2012 Tech Support/Desktop Support for a broad range of small business clients.

+[Charles Bonner](#) 2004-2005 Tech Support during litigation of several cases and arbitrations.

+[Osha Neumann](#) 1995-2023 Provided personal support and configuration for voice to text software for two decades.

-Education

Golden Gate University - Management (2012-2014)

Lincoln University - Computer Science (2003-2005)

Diablo Valley College - Computer Science (1999)

Academy of Art University - 3D Modeling (1998)

Southern University - Electrical Engineering (1993-94)
